## **Wireless Laser Mini Mouse**

**USB, Adjustable Three-Level Resolution, Three Buttons with Scroll Wheel**

**Adjustable three-level resolution with wireless laser performance.**

**Model**  
177139

The MANHATTAN® MLX Wireless Laser Mini Mouse combines modern design with advanced performance. Its under-mount push-button instantly shifts resolution from 800 to 1600 dpi to suit a wide range of applications including routine computing tasks and computer games requiring a fine touch. A handy retractable USB cable reel maintains a proper cord length, reduces tangles and neatly stores in the carrying bag for travel. With auto power management and on/off switch to help maintain proper battery levels, the retractable cable recharges while in use for uninterrupted operation.

### **Precision with Comfort and Convenience**

Its compact-sized, ambidextrous shape and three-button configuration provide direct access to essential commands with minimal wrist movement. A non-slip texture applied to critical surfaces helps provide a secure, comfortable grip. The remarkably small yet powerful USB micro receiver with 2.4 GHz technology provides an effective range of up to 7 m (30 ft.) and stores in a special onboard compartment or remains installed for true wireless convenience.

### **Easy Installation and Low Maintenance**

Plug and Play installation and compatibility with Windows XP/Vista and Mac OS 9.0 and higher offer quick and easy operation. With no mechanical or rolling parts to wear or fail, the MLX Wireless Laser Mini Mouse requires little maintenance for reliable service.

### **Lifetime Warranty**

Strict manufacturing standards ensure the highest quality in all MANHATTAN products. All items carry a full Lifetime Warranty — the strongest quality commitment anyone can make.
